Experienced Full-Stack Developer with a track record of 8+ years in building web applications using JavaScript and Typescript, leveraging the power of frameworks such as Express.JS and React. Adept at driving improvement and automation to streamline development processes, with a keen eye for optimizing performance and enhancing user experiences. Deeply passionate about staying up-to-date with modern programming languages and innovative development techniques, always striving for excellence in delivering cutting-edge solutions.

EXPERIENCE

Adidas via Epam Systems, Remote –Senior Software Engineer – (Apr 2022 – Present)

- Developed end-to-end features for high-traffic applications using React and Node.js, ensuring seamless data flow across decoupled microservices.
- Designed and implemented robust RESTful API contracts, enabling clear communication and integration between frontend and backend services.
- Leveraged micro-frontend architecture to build and maintain modular UI components, supporting independent deployment cycles and reducing build times across teams.
- Optimized database interactions within specific domains to ensure high performance and data integrity under concurrent user requests.
- Conducted detailed peer code reviews to uphold high development standards and ensure code quality.
- Expanded automated test coverage, including unit and integration tests, for React and Node.js projects to proactively identify and resolve regressions.

Tech-Stack: TypeScript, React, Storybook, Redux Toolkit, FP-TS, ExpressJs, Kubernetes, Docker, Jenkins, ElasticSearch, MySql, Cypress, Jest

Reservamos SAAS, Remote –Tech Lead, Web and Mobile – (Aug 2021 – Apr 2022)

- Developing and maintaining an Ecommerce web/mobile app with 60k+ unique daily users
- Mentored and guided 4 junior engineers on industry best practices
- Shorten white label feature delivery by 200% through custom feature branch strategy with git and a unified codebase using factories and feature flags

Tech-Stack: React, Redux, JavaScript, Mixpanel, Taplytics,

Independent Consultant, Remote – Full Stack Software Engineer – (Aug 2017 – Aug 2021)

- Created and developed long-term relationships with clients in the region of Baja California, Mexico to provide valuable solutions through software implementations that fulfill their needs.

Tech-Stack: PHP, Laravel, JavaScript, React, MongoDB, Firebase, MySQL

Grupo EUSAGA Logistica, México – Technology Integration Director – (Oct 2017 – Jun 2020)

- Developed and maintained the automation of data analysis and report creation of the foreign trade area. With this improvement, the time of data analysis was reduced from 2-3 weeks to 1 day per customer. Human error detected on past audits was reduced to 100%.
- Developed a C# console application that works as an interface between foreign trade area software and customer annex 24 software, improving the migration of about 4-7 million rows of data that is synced every month per customer, reducing the upload time of the data from 2-3 days to 2 hours.
- Developed a web application where customers consult the results in a user-friendly environment of the automated audits of the foreign trade area software, allowing them to consult the most up-to-date data in real time.

Tech-Stack: PHP, Laravel, CodeIgniter, SQL Server, MySQL

TLC Asociados S.C, Mexico – Software Development Manager – (Jan 2017 – Oct 2017)

- Developed stored procedures for use with the database of SEER Annex 24 Software that allow to automate foreign trade data audit contained in the database. This solution made it possible for the customer to know its errors in real time in the information they capture in the Annex 24 Software and reduce them on 100%.
- Developed a web application that extracts the audit results from the Annex 24 Software to automate the creation of management reports that are created every month and send to the customer, this improved the company service by a 100%, eliminating the need of human auditors of the foreign trade data.

Tech-Stack: SQL Server, MySQL, PHP, Codeigniter

LANGUAGE

English, B2; Spanish, Native.

CERTIFICATIONS

- **Claude Certified Architect - Foundations**
- **Salesforce Certified AI Associate**

EDUCATION

UTEL University - Computer Systems Engineering (may 2018 – Aug 2020)
